Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, drawn to a method of making glass, classified in class 65, subclass 413.
 - II. Claims 16-19, drawn to a mask blank, classified in class 430, subclass 5.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the method can be used to make a materially different product such as glass fiber.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Mr. Timothy Schaeberle on Sept. 10, 2003 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-15. Affirmation of this election must be made by applicant in replying to this Office action. Claim 16-19 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Art Unit: 1731

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

DETAILED ACTION

6. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Blackwell et al (5,152,819) in view of Flamenbaum et al (3,806,570).

Blackwell et al shows a process for making fused silica glass. Silica precursor is mixed with a metal oxide dopant precursor, Ti oxide precursor, column 4. The precursors are reacted in a soot burner and the soot is deposited on a rotating (Figure 2) mandrel and subsequently in an atmosphere of helium and chlorine drying gas and consolidated (Figure 3). Blackwell is silent as to the translation motion of the mandrel, however such motion of the mandrel would have been obvious as it is standard procedure in the art as evidenced by Flamenbaum et al.

7. It is noted that the IDS filed on 1/13/2003 is a duplicate of the one filed on 8/20/2001 and accordingly, the PTO-1449 of the IDS filed 8/20/2003 has been lined through.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Chin whose telephone number is (703) 308-2046. The examiner can normally be reached on Monday through Friday.
